Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Appeal Brief

1. Applicant's appeal brief filed on 11/28/03 has been received and entered in the case. Applicant's arguments with respect to the prior art rejections have been fully considered and found persuasive, as such; the prior art rejections and the Advisory Action has been withdrawn have been withdrawn. Since the claims now read over cited prior art of record, the case is found to be in allowance condition. However, a new action on the merits appears below.

Applicant's withdrawn of claims 8-35 and 38-41 is acknowledged. However, this application still contains claims 8-35 and 38-41 drawn to an invention non-elected. Therefore, a complete reply to this Office Action must include cancellation of those non-elected claims.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-7, 36 and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhang (US 6,255,861).

With regard to claim 1, Zhang discloses in Fig.1 an inherent comparator circuit comprising an evaluation element (270, 280); and at least first and second input legs (210, 220) each coupled to a corresponding one of a first (N1) and second (N2) node of the evaluation

Art Unit: 2816

element, the first and second input legs having non-complementary structures relative to one another and being adapted to receive respective first and second input signals (110, 120-130), each of the non-complementary structures having associated therewith a variable parameter having a value that is a function of a corresponding one of the input signals, the evaluation element being adapted to perform a comparison of the first and second input signals.

With regard to claims 2-7, Zhang also meets these claimed limitations.

Claim 36 is similarly rejected; note the above discussion with regard to claim 1.

With regard to claim 37, Zhang also meets the claimed limitation in the claim.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai L. Nguyen whose telephone number is 571-272-1747 and Right Fax number is 571-273-1747. The examiner can normally be reached on Monday-Thursdays.
